**TESTIMONY TO THE APPROPRIATIONS COMMITTEE
REGARDING THE COMMISSION ON AGING**

February 18, 2010

My name is Cathy Ludlum. I work as a consultant, and I am a person with a severe physical disability who uses long-term support services.

Since the year 2000 I have been involved with the Commission on Aging through my work with the Long-Term Care Advisory Council. During that time, I have been consistently impressed with the Commission's leadership role in bringing together diverse stakeholders, and helping them to reach consensus over some very difficult issues. The Commission has been a strong partner in changing the paradigm of long-term care services, broadening the spectrum of supports offered, and recognizing that these services are needed by people of all ages.

While I fully understand the difficult economic realities reflected in the Governor's budget, I was dismayed to hear that the Commission on Aging is, again, targeted for elimination. The Commission already endured a 53% budget cut last year. Yet, through unsurpassed commitment and resolve they continue lead the state in long-term care systems change initiatives. The impact of this small agency should not be overlooked. The staff and volunteers serving on the Commission and Long-Term Care Advisory Council comprise an important network of expertise and serve a role not duplicated anywhere in state government.

As we all seek to make government work more efficiently, I urge you not to undo the good work that has already been done. The Commission on Aging is part of the solution. Please reject the Governor's proposal to eliminate the Commission so that it can continue bringing disparate stakeholders and systems together for the benefit of all.

Thank you for your consideration.
